

Bernard ROY Professor, University of Paris-Dauphine Director of LAMSADE 11 is not unusual for a dozen or so loosely related working papers to be published in book form as the natural outgrowth of a scientific gathering. Although many a volume of collected papers has come into point in this way, the homogeneity of the articles included will often be more apparent than real. As the reader will quickly observe, such is not the case with the present volume. As one can judge from its title, it is in fact an outcome of an editorial project by J. Kacprzyk and M. Roubens. They asked contributing authors to submit recent works which would examine within a non-traditional theoretical framework, preference analysis and preference modeling in a fuzzy context oriented towards decision aid. The articles by J.P. Ooignon, B. Monjardet, T. Tanino and Ph. Vincke emphasize the analysis of preference structures, mainly in the presence of incomparability. Intransitivity, thresholds and, more generally, inaccurate determination. Considerable attention is devoted to the analysis of efficient and non-dominated (in Pareto's sense of the term) decisions in the four papers presented by S. Ovchinnikov and M.

The Organization of Charities: Being a Report of the Sixth Section of the International Congress of Charities, Corrections, and Philanthropy, Chicago, June, 1893 (Classic Reprint), Key of Z #4 (of 4), Bundle: Understandable Statistics, 11th + Aplia(TM), 1 term Printed Access Card, Recueil des Cours - Collected Courses, 1992-V (Recueil Des Cours), Afgrundsdjuret (The Abysmal Brute) (Swedish Edition),
